

Narsing Balaji Gurme

Java Backend Developer | Spring Boot | Microservices | Banking & Fintech

Phone: +91 7666255871 | Email: narsinggurme@gmail.com

LinkedIn: [linkedin.com/in/narsing-gurme-141320197](https://www.linkedin.com/in/narsing-gurme-141320197) | GitHub: github.com/narsinggurme

Location: Latur, Maharashtra, India

CORE COMPETENCIES

Java • Spring Boot • Spring Security • Microservices • REST APIs • SOAP • Apache Kafka • Oracle SQL • JWT / OAuth2 • AWS • Docker • CI/CD

PROFESSIONAL SUMMARY

Java Backend Developer with 2+ years of experience building secure, high-performance banking and fintech applications for tier-1 banks including HDFC and QNB. Specialises in microservices architecture using Spring Boot, Spring Security, JWT, and Oracle. Proven track record in REST/SOAP API integration, Kafka-based event-driven messaging, and cloud-aware system design. Strong focus on code quality via SonarQube, performance optimisation (30%+ throughput gains), and reliable distributed systems in Agile environments.

TECHNICAL SKILLS

Languages	Java 8 / 17 / 21, JavaScript, HTML5, CSS3
Backend	Spring Boot, Spring Security, Spring Cloud API Gateway, Hibernate, JPA
Messaging	Apache Kafka (Producers, Consumers, Partitions, Consumer Groups)
APIs	REST, SOAP, JWT / OAuth2, Swagger / OpenAPI, Postman
Databases	Oracle (Query Optimisation, Indexing), MySQL, MongoDB
Cloud & DevOps	AWS (EC2, S3), Git, Maven, CI/CD, Docker
Quality & Servers	SonarQube, SonarLint, JBoss, WebLogic
Architecture	Microservices, Event-Driven, Domain-Driven Design (DDD)
Frontend	Angular
OS	Windows, Linux

PROFESSIONAL EXPERIENCE

Software Developer Image InfoSystems Pvt. Ltd.	Apr 2024 – Present
- Architected and enhanced Spring Boot microservices for high-volume banking workflows, improving transaction throughput by 30% and overall system performance by 20%. - Implemented Spring Security + JWT for secure API authentication and authorisation across REST and SOAP services. - Configured Spring Cloud API Gateway for centralised routing, load balancing, and request filtering across distributed microservices. - Enforced clean-code standards using SonarLint and SonarQube, reducing code smells and critical bugs by 40%. - Collaborated with cross-functional teams (Angular, QA, DevOps) in Agile sprints to deliver banking features on schedule.	

KEY PROJECTS

HDFC Bank – Cheque Truncation System (CTS)	Jun 2024 – Jan 2025
Domain: Payments Cheque Processing Core Banking Integration	
Built and expanded secure Spring Boot + Hibernate backend modules for cheque validation workflows, improving cheque processing speed by 20%.	

- Integrated multiple core banking systems via unified REST and SOAP APIs, increasing system reliability and reducing integration failures.
- Optimised complex Oracle SQL queries for high-volume financial transactions, cutting average query load times by 30%.
- Implemented centralised error handling and structured logging for proactive monitoring and faster incident resolution.

Qatar National Bank (QNB) – Interbank Transaction System

Jan 2025 – Present

Domain: Interbank Transfers | Digital Cheque Processing | Secure Document Storage

- Enhanced Spring Boot + Spring Security-based REST and SOAP services for secure, compliant interbank transactions across borders.
- Developed cheque scanning and digital validation modules with robust document storage integration (Oracle / cloud storage).
- Ensured SOAP WS-Security compliance for cross-border transaction messaging between global banking systems.
- Collaborated with Angular frontend teams to deliver responsive customer-facing banking modules.

EDUCATION

B.E. (Information Technology) | Savitribai Phule Pune University

2019 – 2023

CGPA: 8.32 / 10

CERTIFICATIONS

- Java Full Stack Development – The Kiran Academy

KEY STRENGTHS

Banking Domain Expertise • Secure API Design • Performance Optimisation • Microservices Architecture • Agile Collaboration • Clean Code Practices
